Subject: Recommendation letter

Ms. Diane Chabrierie is an ISEP student that is in internship at WeDiagnostiX. She joined WeDiagnostiX in September 2025 and was integrated in our AI & Software Development Team.

Its role was to develop a Voice to Text AI assistant for Dental professionals. A demonstration was planned for the annual ADF congress planned 25-29 november 2025 in Paris.

Ms. Chabrierie achieved excellent results, delivering a functional solution, despite tight timings, in advance of schedule so that we will be able to present this demonstration in time for the congress.

She was highly involved, diligent and consistently produced work of very high quality.

For these reasons, I highly recommend Ms. Chabrierie for a R&D work, a work in a Lab or an academic semester in an institution.

Please do not hesitate to contact me if you require any further information.

Best regards,

Dr. Didier Ernenwein
