Recommendation letter for Ms Diane CHABRERIE,

Dear madam, sir,

Ms. Diane CHABRERIE is an ISEP student that is currently an intern at WeDiagnosiX. She joined our company in September 2025 in its AI & Software Development Team.

Her role was to develop a Voice-to-Text AI assistant for Dental professionals. A demonstration for her software was scheduled 25-29 november 2025 in Paris for the annual French Dentist Association congress.

Ms. Chabrierie achieved excellent results. She delivered a functional solution using an Automatic Speech Recognition (ASR) system targeting dental vocabulary, with both front-end and back-end integration. She managed to meet deadlines ahead of schedule, allowing us to present this demonstration in time for the conference.

She was highly involved, diligent and consistently produced high-quality work.

For these reasons, I highly recommend Ms. CHABRERIE for any Research and Development internship position, or for an academic semester in an institution of higher learning.

Please do not hesitate to contact me if you require any further information.

With my deepest respect,

Hugues Talbot, distinguished professor,  
CentraleSupélec, Inria,  
Université Paris-Saclay,  
Partner and co-founder of WeDiagnosiX
